Care & Maintenance Top Picture

CARE AND MAINTENANCE

One of the biggest advantages to your new Legato™ carpet system floor is that it is easy to maintain. You can easily deal with stains, wear, and "life's little surprises" that can ruin a regular carpet. Here are some tips on how to handle these surprises.

Vacuum your carpet once per week, especially in traffic lanes, to remove dirt and soil and to keep carpet pile upright. Use an upright, top fill with a beater bar brush for best results. Change vacuum bags regularly to improve the vacuum's ability to remove soil.

For the best cleaning results Milliken recommends using Capture® Dry Carpet Cleaner to maintain the beauty of your new carpet.
